ρ = 0 (schedule unrelated to demand)
ρ = 0.5
ρ = 1 (high price at peak demand)
(a) Rich price variation
(b) Scarce price variation
true
effect error
Anchored at the true value (upper bound)
Anchored, pooled estimate
Anchored, cell-level estimates
Sign-constrained, starts at anchor
Sign-constrained, starts at −0.05
Unconstrained price head
Price as ordinary input
Price-blind
